

OPTICO BUSINESS INTERNET BROADBAND

Speed. Simple Plug and Play. Efficient.

Why settle for slow speed & unreliable services?

Your business deserves better. With Critical Hub's Optico Business Internet Broadband you'll enjoy worry free connectivity at the fastest speeds available.

Next Generation FTTx Connectivity. Critical Hub's Optico Fiber service is next generation Internet Connectivity. The Optico Fiber network has been engineered using 100% Fiber optic technology for the fastest, most reliable service possible. Plus, we've integrated alternative power sources – including generators, solar energy and battery systems – to ensure the highest uptimes, even through major power outages.

Redundancy & Interconnectivity. Critical Hub's backbone is directly interconnected with hundreds of Internet network providers & content providers, to ensure the lowest latency and response time. As operators of the Puerto Rico Internet Exchange, we also host key content servers in Puerto Rico and peer locally with other Internet providers in the region.

Gigabit Speeds. Stop dreaming and get Gigabit connectivity today! Speeds up to 1Gbps (that's 1000Mbps) are available, including synchronous upload/download speeds.

Affordability. Whether you're running a small office network or an enterprise WAN, Optico Fiber has a solution to meet your needs. And with prices as low as \$90 per month, we also meet every budget.

Advantages.

- **Efficient Utilization:** Securely transfer large data, utilize hosted applications, and take advantage of flexibility to add speed at any time.
- **Dedicated Connection:** Ethernet is a dedicated connection, giving you maximum reliability, specifically during peak usage periods.
- **Highly Scalable:** Easily increase bandwidth without costly equipment changes.
- **Simple Plug & Play Setup:** Reduces cost of equipment setup & operation
- **Symmetrical & Asymmetrical Connections:** Reduce time spent waiting for large files to upload. Equal up and download speeds.
- **Better Value:** Greater bandwidth at lower cost per Mbps than T1, Frame Relay, or Private Line.

Connectivity.

- Be at the center of it all. Be at the edge of the cloud. Only Critical Hub offers you the most options and flexibility for your network connectivity.
- Access to the Puerto Rico Bridge Initiative's Internet Exchange Point (IXP), putting your data on the edge of Puerto Rico's cloud.
- Critical Hub's Enterprise IP solutions are among the most diverse, redundant and optimized available – designed to provide high performance and low latency. By leveraging the network connectivity available through our IXP, our network enjoys full interconnectivity with the Internet backbone, use both via both public and private peering arrangements with backbone networks worldwide.

Features.

- Speeds Up to 1 Gbps
- Fiber Optic Connectivity
- Phone Lines
- NAT/ Static IP
